

# TIPS FOR EDUCATING CHILDREN

## Parent Engagement & Learning

### Parents are the first and best educators

Parents play an indispensable role in their children's education. Parent engagement is critical at every age. Make time each day to encourage your child's love for learning.

### 1) Ask them good questions

Make time to have a conversation about their day. What did they find interesting? What do they want to learn more about? What questions do they still have?

### 2) Spend time learning together

Show your child that learning is important. Read a book together, watch an educational show, help them with their homework.

### 3) Take the lead

Don't wait for your child to ask for help. Actively engage their interests and help them discover new ones. Take the initiative and find ways new ways to encourage their learning.
